## Education

### BML Munjal University

*Bachelor of Science in Computer Science*

**July. 2020 – May 2024**

*Gurugram, Haryana*

### Sri Chaitanya Junior College

*12th class*

**June. 2018 – May 2020**

*Vijayawada, Andhra Pradesh*

## Relevant Coursework

- Data Structures
- Database Management
- Computer Networks
- Mobile Development
- OOPS
- Operating System
- Web Development
- Cloud Computing

## Experience

### Benciti Technology Pvt Ltd

*Software Engineer Intern*

**May 2022 – July 2022**

*Bangalore, Karnataka*

- Developed a service to automatically perform a set of unit tests daily on a product in development in order to decrease time needed for team members to identify and fix bugs/issues.
- The contribution is that we added new questions to the app and solving bugs and testing if it is working correctly
- Explored ways to visualize and send a daily report of test results to team members using C++,Javascript,VMWare.

### Wissenaire IIT Bhubaneswar

*Front End Developer Intern*

**Jan 2022 – Feb 2022**

*Bhubaneswar, Odisha*

- Collaborated with a team of web developers to design and implement a dynamic and visually appealing website using HTML, CSS, and JavaScript.
- Implemented responsive web design principles, ensuring seamless user experience across various devices and screen sizes.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

## Projects

### Personal Expenses App | *Flutter, Dart, Firebase*

**December 2022**

- Developed a Personal Expenses app using Flutter, integrating Firebase for seamless data management.
- Implemented an intuitive user interface and expense tracking features, allowing users to efficiently monitor their daily spending.

### Food Ordering app | *Flutter, Dart, Firebase*

**April 2023**

- Created a dynamic Food Ordering app using Flutter that offers a user-friendly way for customers to browse menus, place orders, and enjoy delicious meals.
- Incorporated Firebase backend to ensure efficient data management, enabling real-time updates on orders and menus.

### Loan DAPP | *Solidity, Flutter, Web3.js, Ganache*

**May 2023**

- Engineered a Loan Decentralized Application (DApp) using Flutter, providing a user-friendly platform for users to seamlessly request and manage loans
- Enabled borrowers to apply for loans using smart contracts on a local blockchain.

### Chat Application | *HTML/CSS, NodeJs, MongoDB*

**July 2023**

- Designed and implemented a real-time Chat Application utilizing Node.js and Socket.io, which allows users to engage in seamless and instant communication.
- Deployed the application on Render.com, showcasing proficiency in cloud deployment and server management.
